

Lead Mechanical Service Technician

Founded in 1987, Metrol are global leaders in the innovation, development and operation of wireless down-hole systems. Our main office is located in Kirkhill Industrial Estate in Dyce, but operations are global, and we have offices in Dubai, the United States and other worldwide locations.

We deliver excellence in innovation and performance by caring about our relationships – both with our team and our clients. With a family business culture, we aim to create and provide a working environment that promotes from within, encourages training and development and allows and trusts individuals to maintain a work-life balance.

Benefits Include

- Culture that promotes teamwork and empowering individuals to make a difference
- Challenging role with on-the job training and career progression opportunities
- Further Education opportunities
- 33 days holiday plus additional days for long service
- Company Pension contributions
- Private Healthcare and Life Insurance
- Cycle to Work Scheme

We are looking for an enthusiastic and capable individual to join our busy workshop team based at our facility in Dyce. The role holder will be required to assemble, service and maintain a variety of Metrol tools, assemblies, pipework, clamps and ancillary fittings to meet business needs, as well as assist the Team leader with the organisation and allocation of work.

Principal Duties Include

- Assist with the daily allocation of work, delegating, organising and executing tasks.
- Assemble, disassemble, service, test and clean a range of downhole mechanical parts and equipment.
- Torque and test Metrol BHA mechanical equipment such as gauge carries, tubulars, ISD's, housings, drifts etc., including performing mechanical QC inspection.
- Perform the kitting, preparation and certification of field tool kits.
- Coordinate the loading and unloading of tools and assemblies to and from site.
- Maintain all necessary service and build documentation in relation to equipment being processed.
- Provide mechanical assistance to other departments as required.
- Actively assist with the development of the service workshop team under the guidance of the Team Leader
- Deputise for the Team Leader as required.
- Actively participate in continual process improvement.

Required Skills & Experience

- Experience in a similar role for a minimum of 5 years.
- Experienced in pressure testing and the identification and application of a variety of pressure fittings.
- Experienced in the operation of fully rotational torque unit for the make-up and break-out of downhole oilfield products and assemblies.
- PC literate, in particular the use of database software and Microsoft Office.
- Well organised with a good understanding of the control of equipment service schedules.
- Qualified to NC level in a relevant mechanical engineering discipline.
- Experience operating forklifts
- Banksman Slinger experience

Location

Howe Moss Pace, Kirkhill Industrial Estate, Dyce, Aberdeen.

Careers
**Lead Mechanical Service
Technician**
