

Pro-Log Technician

Founded in 1987, Metrol are global leaders in the innovation, development and operation of wireless down-hole systems, using acoustic, electromagnetic and inductive telemetry.

Metrol's understanding of this technology and its application plays a major part in our success. Our products are already used by energy companies throughout the world during exploration and production, where the data and control provided allows significant advances in efficiency and safety. Metrol's commitment to research and development has ensured that the company stays at the forefront of downhole communications and the successful introduction of a range of new products has resulted in company growth which provides an opportunity for skilled and innovative engineers.

We are located in the Kirkhill Industrial Estate in Dyce, but operations are global, and we have offices in Dubai, the United States and other worldwide locations.

With a family business culture, we aim to create and provide a working environment that promotes from within, encourages training and development and allows and trusts individuals to maintain a work-life balance.

Benefits:

The role comes with a competitive salary and benefits package including:

- Culture that promotes teamwork and empowering individuals to make a difference
- Challenging role with on-the-job training, working as part of an expert team
- 33 days holiday with additional holidays for long service and long service awards
- Company Pension contributions
- Private Healthcare and Life Insurance
- Cycle to work scheme
- EV lease scheme

The Role:

We are actively recruiting an enthusiastic and driven Pro-Log Technician to join our team. This is a full-time role working 37.5 hours per week and is site-based.

Main Duties:

- Work alongside the Mechanical Lead in the manufacture, service, and test of Pro-Log/Subsea products
- Maintain as required, all records and documentation related to equipment being worked upon.
- Assemble and maintain Pro-Log/Subsea deployment equipment such as spoolers, subsea baskets etc
- Participate in the assembly and test R&D of both Pro-Log/Subsea tools and assemblies
- Actively participate in continual process improvement.
- Maintain a high standard of personal safety in the workplace
- Perform duties in line with Metrol QHSE policy
- Attend training courses as requested by management
- Convey a professional image of the company at all times
- Advance the interests of Metrol where possible
- Undertake other duties as may reasonably be required by management

Required Skills & Experience:

Our Pro-Log Technician will require the following knowledge and/or experience:

- Recent experience in assembling, fault finding and repairing mechanical tools.
- Able to interpret mechanical engineering and assembly drawings.
- Experience working with electric, pneumatic and hydraulic control systems preferred.
- Ideally qualified to NC level or equivalent in mechanical engineering, time served or equivalent.
- Valid UK driving licence and forklift certificate.

Location:

Our Main Office is in the Kirkhill Industrial estate in Dyce, Aberdeen. This role may require occasional periods of travel to locations worldwide.
