

Electronic Technician

Working in close co-operation with Metrol's R&D engineers, you will be involved in the development, assembly, test, and repair of a broad range of downhole electronic tools. You will be working with a team of 20 technicians and assemblers.

Required Knowledge & Experience:

- Detailed electronic knowledge down to component level
- Experience of repairing PCBs
- Able to fault diagnose down to resistor, capacitor, transistor and IC level
- Able to understand electronic schematics for PCBs
- Repair and test of analogue and digital electronics is essential
- Qualified to HND level, or above

The following would be advantageous:

- Previous experience with high temperature electronics
- Previous experience as a TV repairman or similar
- Experience in the oil and gas sector
- Familiarity with MS Office applications

Location

Kirkhill Estate, Dyce, Aberdeen, but with the possibility of travel

Salary:

Negotiable

Support for continuing career development may be available. A relocation package may be available.
