

Draughtsperson

Founded in 1987, Metrol are global leaders in the innovation, development and operation of wireless down-hole systems.

Our main office is located in the Kirkhill Industrial Estate in Dyce, but operations are global, and we have offices in Dubai, the United States and other worldwide locations.

We deliver excellence in innovation and performance by caring about our relationships – both with our team and our clients.

With a family business culture, we aim to create and provide a working environment that promotes from within, encourages training and development and allows and trusts individuals to maintain a work-life balance.

Benefits:

The role comes with a competitive salary and benefits package including:

- Culture that promotes teamwork and empowering individuals to make a difference
- Challenging, but rewarding role with on-the job training, working as part of an expert team
- 33 days holiday with additional holidays for long service
- Hybrid/Flexible working opportunities
- Company Pension contributions
- Private Healthcare and Life Insurance
- Cycle to work scheme

The Role:

We are actively recruiting an enthusiastic and experienced Draughtsperson to join our team.

The successful candidate will provide the guidelines and technical details of the parts or assemblies that are being built. They will work with engineers, project engineers and other professionals in producing drawings and procedures relating to the design phase.

Main Duties:

The Draughtsperson will be required to:

- Generate CAD drawings (layouts, assemblies, detail, client etc).
- Generate procedures (assembly, test etc).
- Generate engineering test reports.
- Perform test build of new equipment.
- Perform prototype testing.
- Ordering of equipment for new tools and development work.
- Participate in design reviews.
- Support the Mechanical Engineer(s) and Project Engineer(s) with other tasks and activities as required.
- Maintain design files & related documentation.
- Support operations by working at client sites (onshore and offshore).

Required Skills & Experience:

Our Draughtsperson will require the following knowledge and/or experience:

- Recent experience using CAD software such as Inventor, Vault PDM, SolidWorks, SolidWorks PDM, AutoCAD, or similar.
- Ability to use MS Office applications.
- Ability to communicate effectively and clearly.
- Must be self-motivated and a great team worker.

Location:

Our Main Office is in the Kirkhill Industrial estate in Dyce, Aberdeen. This role may require occasional periods of travel to locations worldwide.
