

Electro/Mechanical Industrial Assembler (Fixed Term)

Founded in 1987, Metrol are global leaders in the innovation, development and operation of wireless down-hole systems, using acoustic, electromagnetic and inductive telemetry.

Metrol's understanding of this technology and its application plays a major part in our success. Our products are already used by energy companies throughout the world during exploration and production, where the data and control provided allows significant advances in efficiency and safety. Metrol's commitment to research and development has ensured that the company stays at the forefront of downhole communications and the successful introduction of a range of new products has resulted in company growth.

Our HQ is in Aberdeen, but operations are global, we have a research facility in Dorset, and offices in Dubai, the United States and other worldwide locations.

With a family business culture, we aim to create and provide a working environment that promotes from within, encourages training and development and allows and trusts individuals to maintain a work-life balance.

Benefits:

The role comes with a competitive salary and benefits package including:

- Culture that promotes teamwork and empowering individuals to make a difference
- Challenging role with on-the-job training, working as part of an expert team
- 33 days holiday with additional holidays for long service and long service awards
- Company Pension contributions
- Private Healthcare and Life Insurance
- Cycle to work scheme
- EV lease scheme
- Flexible/Hybrid working

The Role:

To support our ongoing growth, we are actively recruiting an Electro/Mechanical Industrial Assembler to join our team at our research facility in Blandford Forum, Dorset.

This is for a Fixed Term of 6 months initially.

Main Duties:

- Issue and complete work orders ensuring that stock accuracy is maintained
- Work to assembly drawings and procedures
- Manufacture to a high standard with attention to detail
- Set up and operate production machinery competently and safely
- Carry out simple mechanical and electrical tests of subassemblies and finished product
- Pack and ship finished assemblies to the end user

Required Skills & Experience:

- Ability to interpret technical drawings
- Ability to follow documented processes and follow verbal instructions
- Collating and presenting production and test data

- Experience within an electronic/mechanical manufacturing environment and techniques
- Attention to detail and working within a team to produce quality of workmanship in the timescales required
- Team player with good written, verbal, and interpersonal communication skills
- Experience with MS Office applications

Location:

Metrol Research Centre, Holland Enterprise Park, Holland Way, Blandford Forum, DT11 7FQ.
