

Electronics QC Inspector

Founded in 1987, Metrol are global leaders in the innovation, development and operation of wireless down-hole systems. Our main office is located in the Kirkhill Industrial Estate in Dyce, but operations are global, and we have offices in Dubai, the United States and other worldwide locations.

We deliver excellence in innovation and performance by caring about our relationships – both with our team and our clients. With a family business culture, we aim to create and provide a working environment that promotes from within, encourages training and development and allows and trusts individuals to maintain a work-life balance.

We are looking for an Electronics QC Inspector to join our team in the Electronics Workshop, performing quality control checks and activities in relation to Metrol's electronics components, tools and assemblies.

Benefits

The role comes with an excellent salary and the following benefits:

- Culture that promotes teamwork and empowering individuals to make a difference
- Challenging role with on-the job training. Working as part of an expert team
- Further Education opportunities
- Optional overtime available
- Additional Holidays
- Company Pension contributions
- Private Healthcare and Life Insurance

Principal Duties

The Electronic QC Inspector will be required to:

- Perform quality checks in line with IPC standards on electronic components, tools and assemblies.
- Perform quality inspection at goods inward, appropriate assembly stages and end of line.
- Perform quality checks during workshop activities to ensure that procedures and instructions are being followed.
- Perform and accurately record all inspections, checks and tests in accordance with company processes and instructions.
- Provide support to the electronics workshop, stores and procurement regarding quality control issues.

Required Knowledge & Experience

The Electronics QC Inspector will be require the following knowledge & experience:

- Recent experience in performing quality control inspection of electronic components and assemblies, ideally a minimum of 3 years experience.
- Hands on experience and good working knowledge of electronic test equipment.
- Hands on experience in PCB and electro-mechanical assembly and test.
- Minimum NC Electronic and Electrical Engineering or equivalent.
- Trained in IPC standards.

Location

Kirkhill Industrial Estate, Dyce, Aberdeen.
