
Mechanical Technician

Founded in 1987, Metrol are global leaders in the innovation, development and operation of wireless down-hole systems, using acoustic, electromagnetic and inductive telemetry.

Metrol's understanding of this technology and its application plays a major part in our success. Our products are already used by energy companies throughout the world during exploration and production, where the data and control provided allows significant advances in efficiency and safety. Metrol's commitment to research and development has ensured that the company stays at the forefront of downhole communications and the successful introduction of a range of new products has resulted in company growth.

We are located in the Kirkhill Industrial Estate in Dyce, but operations are global, and we have offices in Dubai, the United States and other worldwide locations.

With a family business culture, we aim to create and provide a working environment that promotes from within, encourages training and development and allows and trusts individuals to maintain a work-life balance.

Benefits:

The role comes with a competitive salary and benefits package including:

- Culture that promotes teamwork and empowering individuals to make a difference
- Challenging role with on-the-job training, working as part of an expert team
- 33 days holiday with additional holidays for long service and long service awards
- Company Pension contributions
- Private Healthcare and Life Insurance
- Cycle to work scheme
- EV lease scheme
- Flexible/Hybrid working

The Role:

As part of our ongoing growth, we are actively recruiting a Mechanical Technician to join our Mechanical Production team, dealing with all mechanical aspects of Metrol's equipment and systems.

Main Duties:

- Undertake build, repair, and maintenance of downhole mechanical assemblies.
- Perform test build of new equipment; perform prototype testing.
- Be competent to work on mechanical equipment and systems in the downhole sector of the oil industry.
- Read drawings, interpret work instructions and perform the work to time and quality.
- Be able to carry out surveys and pre-fit examinations of equipment.
- Advise on ordering of equipment for new tools and development work.
- Carry out function and pressure testing. Carry out gas testing.
- Participate in design reviews.
- Support internal customers on technical queries.
- Maintain build files & related documentation.
- Support operations by working at client sites (onshore and offshore).
- Be competent to use general workshop machinery and hand tools related to the role of a mechanical fitter.

Required Skills & Experience:

- Time served apprenticeship or equivalent.
- Five years' experience as a Mechanical Fitter or Tool Dresser.
- Oilfield downhole tools.
- Ideally has hydrostatic and gas testing experience.

Location:

Our Main Office is in the Kirkhill Industrial estate in Dyce, Aberdeen, however occasional travel may be required to other Metrol sites or Client locations.
